

# Knowledge and Discretion in Government Regulation

Well-documented and clearly-written, this important volume examines the interaction between scientific and engineering knowledge and the exercise of policy discretion in environmental, health, and safety regulation. The findings presented in the work derive in large part from a three-year study of two regulatory programs, the hazardous air pollutant program of the Environmental Protection Agency and the occupational health standards program of the Occupational Safety and Health Administration, and are based upon the activities within these programs between 1971 and 1980. The authors' first-hand experience in the Office of Science and Technology in the Executive Office of the President during the Carter Administration further enhances the authority and thoroughness of the volume.

Fortunately for his kingdom his young queen, Bywyd was as sharp as he was dull. She advised him in all matters of state, and benevolently attended concerned citizens and visiting dignitaries alike, always with a graceful nod to her husband and a quiet *~ç~*May it please your Majesty.*~ç~*• So it was that they ruled in peace

for many years troubled only by the lack of Ysbryd-ane an heir to carry on the divine dragon blood of Gwirions ancestors. When Bywyd found herself full with child at last she rejoiced that their kingdom would be secured, their rule assuredly peaceful for the rest of their lives. And when the child was born, with raven black hair so dark against eyes as blue as lightning and skin as pale as snow, they called her Eirwyn and raised her to understand the five aspects of the dragon that she must must ever personify to rule her people. Before her sixth birthday, Eirwyn was already tired of the dusty words she had learned by rote.
